RESEARCHING LEARNING CHALLENGES COMPETITION

COMPETITION TYPE: Team — Closed to spectators

ELIGIBILITY LEVELS: High School Junior Varsity, High School Varsity, Collegiate

EDUCATORS RISING STANDARDS:

- Standard I: Understanding the Profession
- Standard II: Learning About Students
- Standard VI: Using Assessments and Data
- Standard VII: Engaging in Reflective Practice

Contest Purpose

Approximately 7.3 million students in American public schools have been diagnosed with learning disabilities and receive special education services. (Citation: https://nces.ed.gov/programs/coe/indicator_cgg.asp) Understanding how to support students with special needs is central to success as an educator. This competition offers Educators Rising students the opportunity to explore deeply and to develop recommendations regarding effective educational supports for students with special needs.

The Individuals with Disabilities Education Act (IDEA) groups students into fourteen disability categories. They are:

- | | |
|----------------------------|---|
| 1. Autism | 8. Orthopedic impairment |
| 2. Deaf-blindness | 9. Other health impairments |
| 3. Developmental delay | 10. Preschool disabled |
| 4. Emotional disturbance | 11. Specific learning disability (e.g., dyslexia) |
| 5. Hearing impairment | 12. Speech or language impairment |
| 6. Intellectual disability | 13. Traumatic brain injury |
| 7. Multiple disabilities | 14. Visual impairment |

This year's competition focuses on the specific learning disability called Dyscalculia.

The Learning Disability Association of America states that "Dyscalculia is associated with weaknesses in fundamental number representation and processing, which results in difficulties with quantifying sets without counting, using nonverbal processes to complete simple numerical operations, and estimating relative magnitudes of sets.

Because these math skills are necessary for higher-level math problem solving, quantitative reasoning is likely impaired for these individuals." (Citation <https://ldaamerica.org/disabilities/dyscalculia/>)

Dyscalculia can impact:

- | | |
|--|--|
| <ul style="list-style-type: none">• Estimating a quantity without counting• Calculation skills• Using processes to solve equations• Mental math• Remembering steps in a sequence | <ul style="list-style-type: none">• Reading graphs or charts• Remembering dates and deadlines• Counting change• Navigation skills |
|--|--|

The purpose of this competition is to work collaboratively to learn more about this specific learning challenge and to produce a research-supported position paper and presentation to explain and advocate for positive practices in schools to support the education of students with dyscalculia. Imagine that the local school board has asked you: “What specific steps should we take to support the education of students with dyscalculia? Also, why should we accept your recommendations?”

Team members should research dyscalculia and best practices to support the education of students with this learning challenge. You are encouraged to embark on this research using traditional sources as well as primary sources (ex. conducting interviews with individuals impacted by this disability or professionals who support individuals with this disability, etc.). Then team members should discuss the research in order to determine recommendations for their paper and presentation.

Team members will collaborate on a research-supported position paper, which will be no shorter than four full pages and no longer than six full pages, to offer their recommendations. The minimum number of student collaborators is two, but there is no maximum. The position paper must include cited references (MLA, APA, or Chicago style are acceptable) and a works cited sheet, which will not count toward the four-to-six-page length requirement. (Also, the title page doesn't count toward the length requirement. If you are unable to reach the minimum length required, resume the research process — there is a lot of quality material out there on this topic.) The position paper will be submitted with the competition application and will be scored by judges prior to the national conference.

Competition Guidelines

There are two components to this competition:

- *A position paper, submitted and scored by judges prior to the national conference, and*
- *An interactive session (including a presentation) with judges on-site at national conference.*

A. Team members will use the information collected in the research phase to collaborate in creating two products: a position paper and a slide deck presentation.

B. The position paper will include a title page, a works cited page (using MLA, APA, or Chicago citation style) and four-to-six full pages of research-supported recommendations with appropriate context. The works cited and title pages will not count towards the four-to-six-page length. The position paper must be submitted online.

C. The slide deck presentation (ex. PowerPoint,

Prezi) should engagingly complement and deliver the team's research findings and recommendations.

D. At the Educators Rising National Conference, qualifying representatives (two to four students) must present to a panel of expert judges for up to 10 minutes about their research using the slide deck as their visual aid. Students will also respond to judges' questions on the assigned topic and presentation; the entire interactive session with judges may last up to 15 minutes.

E. Team members should bring the file of their slide deck on a USB drive.

Judging and scoring

1. The judges' decisions are final.
2. Scoring is based on the Researching Learning Challenges Competition rubric.

Application

All competitors must complete the online application and upload any required materials by the stated deadline on the [National Competition page](#) located in the Student Resources section in the EdRising Membership Portal. **Deadline extensions will NOT be granted.**
